

Ticket Management System – Documentation

1. Overview

This document describes the frontend screens, sections, and fields required for the Ticket Management System. The system supports three user roles: **Customer**, **Staff (Support Agent)**, and **Admin**. Each role has a dedicated set of screens tailored to their responsibilities.

2. User Roles

Role	Description
Customer	Raises tickets for product issues and tracks their resolution
Staff	Manages, responds to, and resolves tickets assigned to them
Admin	Oversees the entire system, manages users/staff, and monitors ticket performance

3. Admin Module

a. Admin Dashboard

- Overall summary cards: Total Tickets, Open, Resolved, Overdue, Pending Account Approvals
- Staff list (performance overview)
- Ticket trend graph (daily/weekly/monthly)
- Department/category-wise ticket distribution (optional)

b. All tickets (Master View) Screen

- Search bar

- Advanced filters: Status, Priority, Category, Staff, Customer, Date Range
- Table columns: Ticket ID, Customer, Assigned Staff, Subject, Priority, Status, Created Date
- Export option (CSV/PDF)

c. User Management Screen

- List of Customers (Name, Email, Company, Status — Active / Pending Approval / Blocked)
- Search/Filter
- View / Edit / Deactivate actions

d. Staff Management Screen

- List of Staff (Name, Email, Department, Tickets Assigned, Status)
- Add New Staff button → form: Name, Email, Phone, Department, Role/Designation, Password
- Edit / Deactivate actions

e. Category / Department Management Screen

- List of categories/departments
- Add/Edit/Delete category
- Fields: Category Name, Description, Default Priority, Assigned Department

f. Account Approval Screen

- List of pending customer account requests (Full Name, Email, Company, Phone Number, Submitted Date)
- Search and Filter by date or pending status
- Approve button (activates the account and sends a login confirmation email to the customer)
- Reject button (rejects the account request with an optional reason/note)
- Notification badge shown on Admin Dashboard whenever a new account registration request arrives
- APPROVAL PROCESS — When a customer submits their self-registration, Admin receives a notification and opens

the pending request. The approval screen shows the following steps:

- **Step A: Customer & Company Details Review**
 1. Read-only summary of all registration details self-submitted by the customer (company info, contact, address, AMC details, product(s) in use)
 2. Product(s) / Service(s) in Use — displayed prominently so admin can verify against company records
 3. Contract / Agreement Reference Number (if provided)
- **Step B: Product Verification**
 1. Admin confirms which product(s) the customer is actively using from the registered list
 2. Product verification status dropdown: Verified / Needs Clarification / Not Found in Records
 3. Internal note field for admin to add any observations before proceeding
- **Step C: Staff Assignment (done at approval time, not per-ticket)**
 1. Staff list table displayed — shows all available staff members with the following columns:
 2. Staff Name | Department | Product(s) They Handle | Active Tickets Count | Current Status
 3. Admin selects the appropriate staff members from this list based on the customer's product and the staff member's current availability
 4. If customer uses multiple products, admin can assign one primary staff member or one dedicated staff per product
 5. Confirm Assignment button — saves the assignment and sends a notification to the selected staff member about the new customer
- **Step D: Final Approval Action**
 1. Approve button — activates the customer account, saves the staff assignment, and sends login credentials to the primary contact email
 2. Reject button — rejects the account with an optional reason; customer is notified via email

- 3. Request More Info button — puts the account on hold and sends a query email to the customer for clarification
- Post-Approval: All tickets raised by this customer automatically route to the assigned staff member without any further manual intervention by admin

4. Staff Module

a. Staff Dashboard

- Summary cards: Assigned tickets, Open, in progress, Resolved Today
- Priority wise ticket count
- Recent assigned tickets list
- Notification bell icon (optional)

b. Assigned Tickets Screen

- Search bar
- Filters: Status, Priority, Category, Customer Name, Date Range
- Table columns: Ticket ID, Customer Name, Subject, Priority, Status, SLA Timer, Assigned Date
- Bulk action options (assign, change status)

c. Ticket Detail / Response Screen

- Ticket ID, Subject, Customer details (Name, Email, Company)
- Priority & Category (editable by staff)
- Status dropdown (Open / In Progress / On Hold / Resolved / Closed)
- Customer and staff conversations
- Internal notes section (visible only to staff/admin, not customer)
- Reply text box with attachment option
- Reassign Ticket option (transfer to another staff/department)
- Escalate to Admin button
- Send / Update button

d. My Performance Screen (Optional)

- Tickets resolved (count, avg resolution time)

5. Customer Module

a. Customer Dashboard

- Welcome Banner
- Summary Cards (Total tickets, Open tickets, resolved tickets, Pending tickets)
- Recent tickets lists (Ticket ID, Subject, Status, Last Updated)
